

ALLUX MEDICAL, INC.

REFERENCE OF ONLINEMED

This Reference is made as of Erica J. Rogers, Allux Medical, Inc., a Delaware corporation for Tamas Vedelek, OnlineInfoTech Ltd on 25th of Jan 2010.

The Allux Medical Inc. made an international clinic research of an open prospective pilot study of the effect of UV Light (Beam Reach™) on nasal polyps (Prot.Nr.: 00-00377-CTP01).

The informatics background of this research was OnlineMed administrative software. The registration of the patients and the storage of all videos and photos made by treatments were done in Online Med. With the help of OnlineMed we could share the photos and datas between Hungary-USA-Hong Kong.

The OnlineMed system absolutely measured up to all of our expectations. To use, to learn this system or the data registration was simple and easy. The processing of datas even from distance gave us huge support for our research.

This reference is made for Online InfoTech from Allux Medical Inc.:
